COURSE: C4661D3 – E-GOVERNANCE

UNIT–2: E-Governance Models

PART A — MCQs (10)

(Question Type: MCQ | Course Content: Unit–1)

1. G2C stands for
   A) Govt to Company
   B) Govt to Citizen
   C) Governance to Citizen
   D) Group to Citizen
   Ans: B
2. Online passport service is an example of
   A) G2G
   B) G2E
   C) G2B
   D) G2C
   Ans: D
3. Income tax filing for companies falls under
   A) G2C
   B) G2B
   C) G2E
   D) G2G
   Ans: B
4. Payroll systems for employees belong to
   A) G2E
   B) G2C
   C) G2B
   D) G2G
   Ans: A
5. Inter-department coordination uses
   A) G2B
   B) G2C
   C) G2G
   D) G2E
   Ans: C
6. UN E-Governance model measures
   A) Cost
   B) Maturity stages
   C) Programming level
   D) Hardware
   Ans: B
7. Gartner model focuses on
   A) Networking
   B) Evolution stages

C) Security only
D) Coding
Ans: B

8. Service delivery models aim to improve
   A) Delays
   B) Accessibility
   C) Paperwork
   D) Manual work
   Ans: B
9. Which model is citizen-centric
   A) G2C
   B) G2E
   C) G2G
   D) G2B
   Ans: A
10. E-Governance models mainly improve
    A) Control
    B) Efficiency
    C) Complexity
    D) Cost
    Ans: B

v

PART B — DESCRIPTIVE QUESTION BANK (10)

(Question Type: Descriptive | Course Content: Unit–1)

You can add these as **"Without Option"** questions.

---

1. Explain G2C Model with examples. (5 Marks)

Answer:

G2C (Government to Citizen) is a service delivery model where the government provides services directly to citizens through digital platforms. It aims to make public services fast, transparent, and easily accessible.

Key Points:

1. **Direct Service Delivery**
   Citizens can apply for documents like passports, birth certificates, or driving licenses online without visiting offices.
2. **Convenience and Accessibility**
   Services are available 24/7 through websites or mobile apps, saving time and travel costs.

3. **Transparency**
   Citizens can track the status of applications, which reduces corruption and uncertainty.
4. **Examples**
   Passport Seva Portal, online electricity bill payment, DigiLocker, and Aadhaar services are common G2C examples.
5. **Citizen Empowerment**
   Online grievance portals allow citizens to raise complaints and give feedback directly to authorities.

---

2. Describe G2B Model. (5 Marks)

Answer:

G2B (Government to Business) refers to digital interaction between government and business organizations for services like licensing, taxation, and compliance.

Key Points:

1. **Online Tax Filing**
   Businesses can submit GST returns and corporate taxes online, reducing paperwork.
2. **Licensing and Registration**
   Companies can apply for permits and registrations digitally, speeding up approvals.
3. **Transparency in Procurement**
   E-tendering systems allow fair bidding and reduce corruption in government contracts.
4. **Cost and Time Efficiency**
   Digital platforms reduce manual processing and administrative delays.
5. **Improved Business Environment**
   Easy digital interaction encourages investment and improves economic growth.

---

3. Explain G2G Model. (5 Marks)

Answer:

G2G (Government to Government) refers to digital communication and data sharing between different government departments or agencies to improve coordination.

Key Points:

1. **Data Sharing**
   Departments exchange information electronically, reducing duplication of work.

2. **Coordination Between Agencies**
   Helps central, state, and local governments work together effectively.
3. **Faster Decision Making**
   Real-time information enables quick administrative decisions.
4. **Reduced Paperwork**
   Digital records replace manual files, improving efficiency.
5. **Examples**
   Integrated financial management systems and digital police networks are examples of G2G.

---

4. What is G2E Model? (5 Marks)

Answer:

G2E (Government to Employee) focuses on providing digital services and support to government employees through online systems.

Key Points:

1. **Payroll Management**
   Employees can view salary details, tax deductions, and payslips online.
2. **Leave Management Systems**
   Online leave applications make HR processes faster and more organized.
3. **Training and Development**
   Digital platforms provide online learning and skill development programs.
4. **Pension and Benefits**
   Retired employees can access pension details through online portals.
5. **Improved Communication**
   Internal portals allow easy communication between employees and departments.

---

5. Explain UN E-Governance Maturity Model. (5 Marks)

Answer:

The UN E-Governance maturity model describes the stages through which governments develop digital services from basic information sharing to fully connected governance.

Stages:

1. **Emerging Presence**
   Government websites provide basic information to citizens.

2. **Enhanced Presence**
   More detailed information such as policies and reports is available online.
3. **Interactive Presence**
   Citizens can download forms and communicate through email.
4. **Transactional Stage**
   Online payments, applications, and service delivery become possible.
5. **Connected Governance**
   Integrated digital platforms provide seamless and citizen-centric services.

---

6. Explain Gartner E-Governance Model. (5 Marks)

Answer:

The Gartner model explains how E-Governance evolves in stages from simple online presence to complete digital transformation.

Stages:

1. **Presence Stage**
   Government creates websites to share basic information.
2. **Interaction Stage**
   Citizens can interact using forms and emails.
3. **Transaction Stage**
   Online services like payments and applications are introduced.
4. **Transformation Stage**
   Multiple services are integrated into a single platform.
5. **Citizen-Centric Governance**
   Focus shifts to improving user experience and service quality.

---

7. Differentiate G2C and G2B. (5 Marks)

Answer:

G2C (Government to Citizen) and G2B (Government to Business) are two important E-Governance service models. The following table shows their proper comparison:

Basis of Comparison	G2C (Government to Citizen)	G2B (Government to Business)
Meaning	Provides digital services directly to individual citizens.	Provides digital services and interaction between government and business organizations.
Target Users	General public or citizens of the country.	Companies, industries, and business entities.
Purpose	To improve public service delivery and citizen welfare.	To simplify business processes like taxation, licensing, and compliance.
Type of Services	Passport services, birth certificates, bill payments, online grievances.	GST filing, e-tendering, company registration, business permits.
Main Benefit	Convenience, transparency, and easy access to services for citizens.	Faster approvals, reduced paperwork, and better business environment.

---

8. What are Service Delivery Models? (5 Marks)

Answer:

Service delivery models are frameworks or methods used by governments to provide digital services to citizens, businesses, and employees efficiently.

Key Points:

1. **Digital Platforms**
   Services are provided through websites, mobile apps, and online portals.
2. **Multi-Channel Access**
   Services can be accessed through kiosks, call centers, or mobile devices.
3. **User-Centric Design**
   Models focus on making services simple and easy to use.
4. **Integration of Services**
   Multiple services are combined into one platform for convenience.
5. **Efficiency Improvement**
   Reduces manual work and ensures faster service delivery.

---

9. Why are Governance Models Important? (5 Marks)

Answer:

Governance models provide structured frameworks that help governments plan, implement, and manage digital services effectively.

Key Points:

1. **Clear Structure**
   Models define how services should be delivered and managed.
2. **Better Planning**
   Helps governments implement E-Governance step by step.
3. **Consistency**
   Ensures uniform service delivery across departments.
4. **Improved Efficiency**
   Reduces confusion and duplication of work.
5. **Citizen Satisfaction**
   Well-designed models improve user experience and accessibility.

---

10. Discuss Benefits of E-Governance Models. (5 Marks)

Answer:

E-Governance models help governments deliver services efficiently by using structured digital frameworks.

Key Benefits:

1. **Improved Efficiency**
   Digital processes reduce delays and improve productivity.
2. **Transparency**
   Online systems make information accessible to citizens.
3. **Accessibility**
   Services are available anytime and from anywhere.
4. **Better Coordination**
   Models improve collaboration between departments.
5. **Enhanced Service Quality**
   Citizens receive faster and more reliable services.
